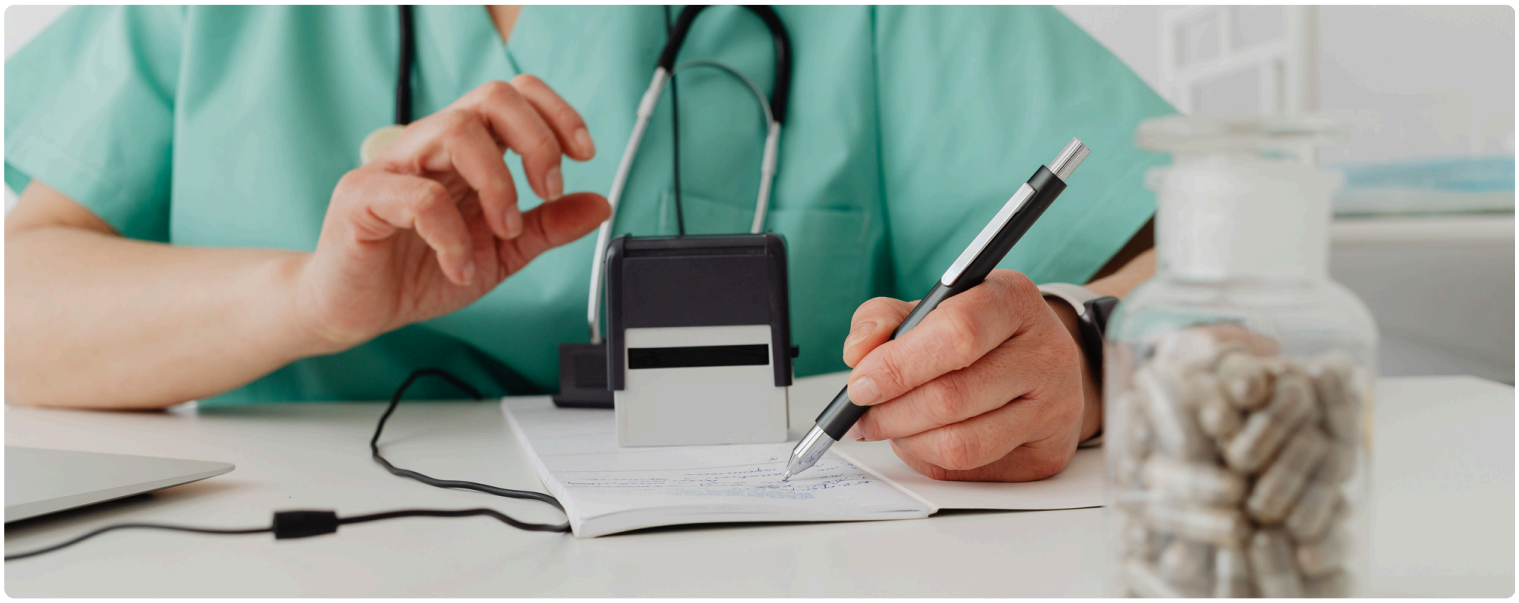
INDITECH HEALTH SOLUTIONS

CLINIC-FIRST SYSTEMS THAT TURN BRAND PLANS INTO MEASURABLE OUTCOMES



We are a healthcare solutions company that works with pharmaceutical brands to close the gap between brand intent and real-world clinical outcomes. We don't replace your campaigns. We make them work where decisions actually happen - inside the clinic.

ACROSS 35+ PEDIATRIC BRANDS,

we have delivered nearly 60 tailored health solutions for leading MNCs and boutique pharma companies, addressing diverse brand challenges and improving KPIs.

Our IAP- and SAPA-compliant, doctor-anchored solutions are designed to work within real clinical workflows ~ supporting better decisions at the moment of care and translating strategy into measurable brand growth.

We ensure that brand strategies planned centrally deliver results where it matters most: inside the consultation.

THE SHIFT WE SEE ACROSS PEDIATRIC BRANDS

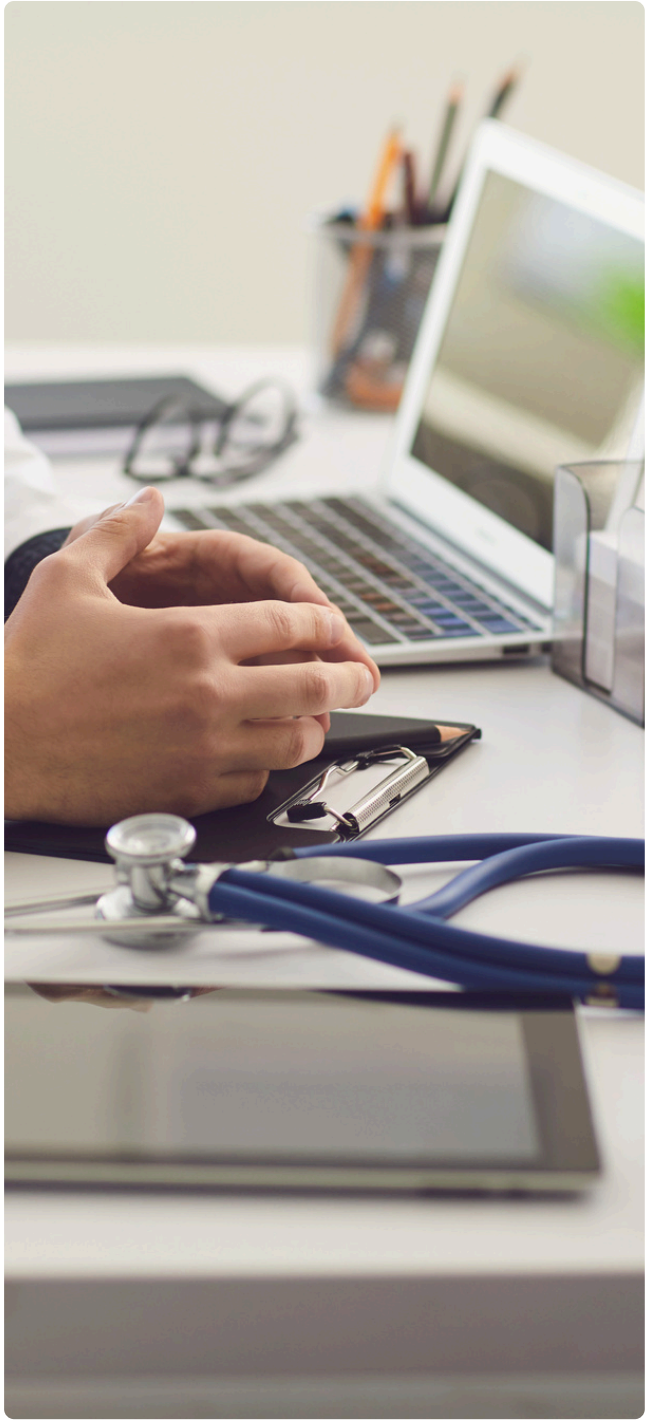
Most established pediatric brands today are focused on~

- Building strong brand awareness among pediatricians
- Running campaigns to drive regular recommendation in routine practice
- Expanding consistent field force coverage and reach
- Planning well-structured annual brand campaigns

Yet growth plateaus. Why?

Because incremental gains are no longer driven by more messaging, but by what happens at specific decision moments inside the clinic. The moment of care is where brands are chosen.

WHERE BRAND EFFORTS SILENTLY BREAK



Across therapy areas, we see repeated friction at five critical clinic decision moments:

1. ORIGINATION – Patients reach clinics too late
2. TREATMENT CHOICE – Guideline-aligned therapies lose out under pressure
3. CLASS CHOICE – Familiar treatments are chosen over the right class
4. BRAND PICK – Familiar brands win in the moment
5. ADHERENCE – Follow-through drops after initiation

> *Brand strategies often break down at these moments of care ~ directly impacting adoption and sustained growth.*

WHAT WE DO

We design doctor-anchored solutions that ~

- Activate at the exact moment a decision is made
- Make the right choice the easy choice
- Support doctors without adding burden
- Extend care beyond the consultation
- Convert brand intent into trackable KPIs

Our solutions translate brand plans into real prescribing behavior by supporting clinical decisions precisely at the point of care.
